This will include viability tests, internalization tests, targeting tests, functional tests (immune activation, polarization...), etc. These tests will be performed in classic 2D cell cultures, in co-cultures and in 3D cultures, as well as on PBMCs from donors. This task spans from month 13 to month 36 of the project.

The BIPD will also be involved in the more administrative stages of the project (communication/outreach, sustainability and exploitation) and will liaise between the groups involved in the project (UMinho-INL).
